

JOHN DEERE

CALIFORNIA AND U.S. EPA EMISSIONS CONTROL WARRANTY STATEMENT YOUR WARRANTY RIGHTS AND OBLIGATIONS

To determine if the John Deere engine qualifies for the additional warranties set forth below, look for the "Engine Information" label located on the engine. If the engine is operated in the United States or Canada and the engine label states: "Engine conforms to US EPA Regulations For Large Off-Road SI Engines," refer to the "U.S. and Canada Emission Control Warranty Statement." If the engine is operated in California, and the engine label states: "This engine conforms to California regulations for Off-Road Large SI engines," also refer to the "California Emission Control Warranty Statement."

Warranties stated on this certificate refer only to emissions-related parts and components of your engine. The complete engine warranty, less emissions-related parts and components, is provided separately.

U.S. AND CANADA EMISSIONS CONTROL WARRANTY STATEMENT:

John Deere warrants to the ultimate purchaser and each subsequent purchaser that this off-road LSI engine was designed, built and equipped so as to conform at the time of sale with applicable regulations under 40 CFR Part 1048 and is free from defects in materials and workmanship which would cause the engine to fail to conform with applicable regulations for a period of three years from the date of delivery to the original ultimate purchaser or 2,500 hours of operation, whichever first occurs.

John Deere will repair or replace, as it elects, any part or component with a defect in materials or workmanship that would increase the engine's emissions of any pollutant within the stated warranty period. Warranty coverage is subject to the limitations and exclusions set forth herein.

EMISSIONS WARRANTY EXCLUSIONS:

John Deere may deny warranty claims for failures caused by non-performance of maintenance requirements listed in the Operator's Manual.

John Deere is not liable for damage to other engine components caused by a failure of an emissions related part, unless otherwise covered by standard warranty.

John Deere may deny the owner warranty coverage if the non road LSI engine or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications or alterations.

John Deere may deny warranty claims for failures caused by the unauthorized or unreasonable use of an engine following sale.

Where permitted by law, neither John Deere, or any authorized John Deere engine distributor, dealer, or repair facility, or any company affiliated with John Deere will be liable for incidental or consequential damages.

CALIFORNIA EMISSIONS CONTROL WARRANTY STATEMENT

The California Air Resources Board (CARB) is pleased to explain the emission-control system warranty on your off-road large spark-ignition (LSI) engine. In California, new off-road large spark-ignition engines must be designed, built and equipped to meet the State's stringent ant-smog standards. John Deere must warrant the emission control system on your engine for the periods of time listed below provided there has been no abuse, neglect or improper maintenance of your engine.

Your emission control system may include parts such as the carburetor, regulator or fuel-injection system, ignition system, engine computer unit, catalytic converter and air induction system. Also included may be sensors, hoses, belts, connectors and other emission-related assemblies.

John Deere warrants to the ultimate purchaser and each subsequent purchaser that this off-road LSI engine was designed, built, and equipped so as to conform at the time of sale with all applicable regulations adopted by CARB and is free from defects in materials and workmanship which would cause the failure of a warranted part to be identical in all material respects to the part as described in John Deere's application for certification for a period of three years from the date the engine is delivered to an ultimate purchaser or 2,500 hours of operation, whichever occurs first.

EMISSIONS WARRANTY EXCLUSIONS:

John Deere may deny warranty claims for failures caused by the use of an add-on or modified part which has not been exempted by the CARB. A modified part is an aftermarket part intended to replace an original emission-related part which is not functionally identical in all respects and which in any way affects emissions. An add-on part is any aftermarket part which is not a modified part or a replacement part.

JOHN DEERE'S WARRANTY RESPONSIBILITY

Where a warrantable condition exists, John Deere will repair or replace, as it elects, your off-road LSI engine at no cost to you, including diagnosis, parts or labor. Warranty coverage is subject to the limitations and exclusions set forth herein. The off-road LSI engine is warranted for a period of three years from the date the engine is delivered to an ultimate purchaser or 2,500 hours of operation, whichever occurs first. The following are emissions-related parts:

Air Induction System	Exhaust manifold*	Oil filler cap
Intake manifold*	Ignition Control System	Miscellaneous Items used in Above Systems
Fuel Metering System	Electronic Control Unit*	Sensors, actuators
LPG Pressure Regulator*	O2, MAP, UTTP, & CAMP Sensors	hoses, connectors, clamps, fittings,
Throttle*	Ignition coil	gaskets, mounting hardware
Mixer*	Wiring Harness*	Emission control information labels
Exhaust System	Positive Crankcase Ventilation (PCV) System	
Catalytic Converter*	PCV valve	

Emission-related parts with an asterisk are covered for a period of five years from the date of delivery to the ultimate purchaser or 3,500 hours of operation, whichever first occurs. Any warranted emissions-related part scheduled for replacement as required maintenance is warranted by John Deere for the period of time prior to the first scheduled replacement point for the part. Any warranted emissions-related part not scheduled for replacement as required maintenance or scheduled only for regular inspection is warranted by John Deere for the stated warranty period.

OWNER'S WARRANTY RESPONSIBILITIES:

As the LSI engine owner you are responsible for the performance of the required maintenance listed in your Operator's Manual. John Deere recommends that the owner retain all receipts covering maintenance on the off-road LSI engine, but John Deere cannot deny warranty solely for the lack of receipts or for the owner's failure to ensure the performance of all scheduled maintenance. However, as the off-road LSI engine owner, you should be aware that John Deere may deny you warranty coverage if your off-road LSI engine or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.

The off-road LSI engine is designed to operate on liquid propane fuel as specified in the Fuels, Lubricants and Coolants section in the Operators Manual. Use of any other fuel may result in the engine no longer operating in compliance with mandated emissions requirements.

The owner is responsible for initiating the warranty process, and should present the machine to the nearest authorized John Deere dealer as soon as a problem is suspected. The warranty repairs should be completed by the authorized John Deere dealer as quickly as possible.

Emissions regulations require the customer to bring the unit to an authorized servicing dealer when required. As a result, John Deere is NOT liable for travel or mileage on emissions warranty service calls.

If you have any questions regarding our warranty rights and responsibilities, you should contact John Deere at 1-319.292-5400.
