

Operations Center Update - March 2024

John Deere Operations Center™ provides simple but powerful management tools for your equipment and crop data, anytime, anywhere through the web and mobile device. Learn more by going directly to [John Deere Operations Center](#).

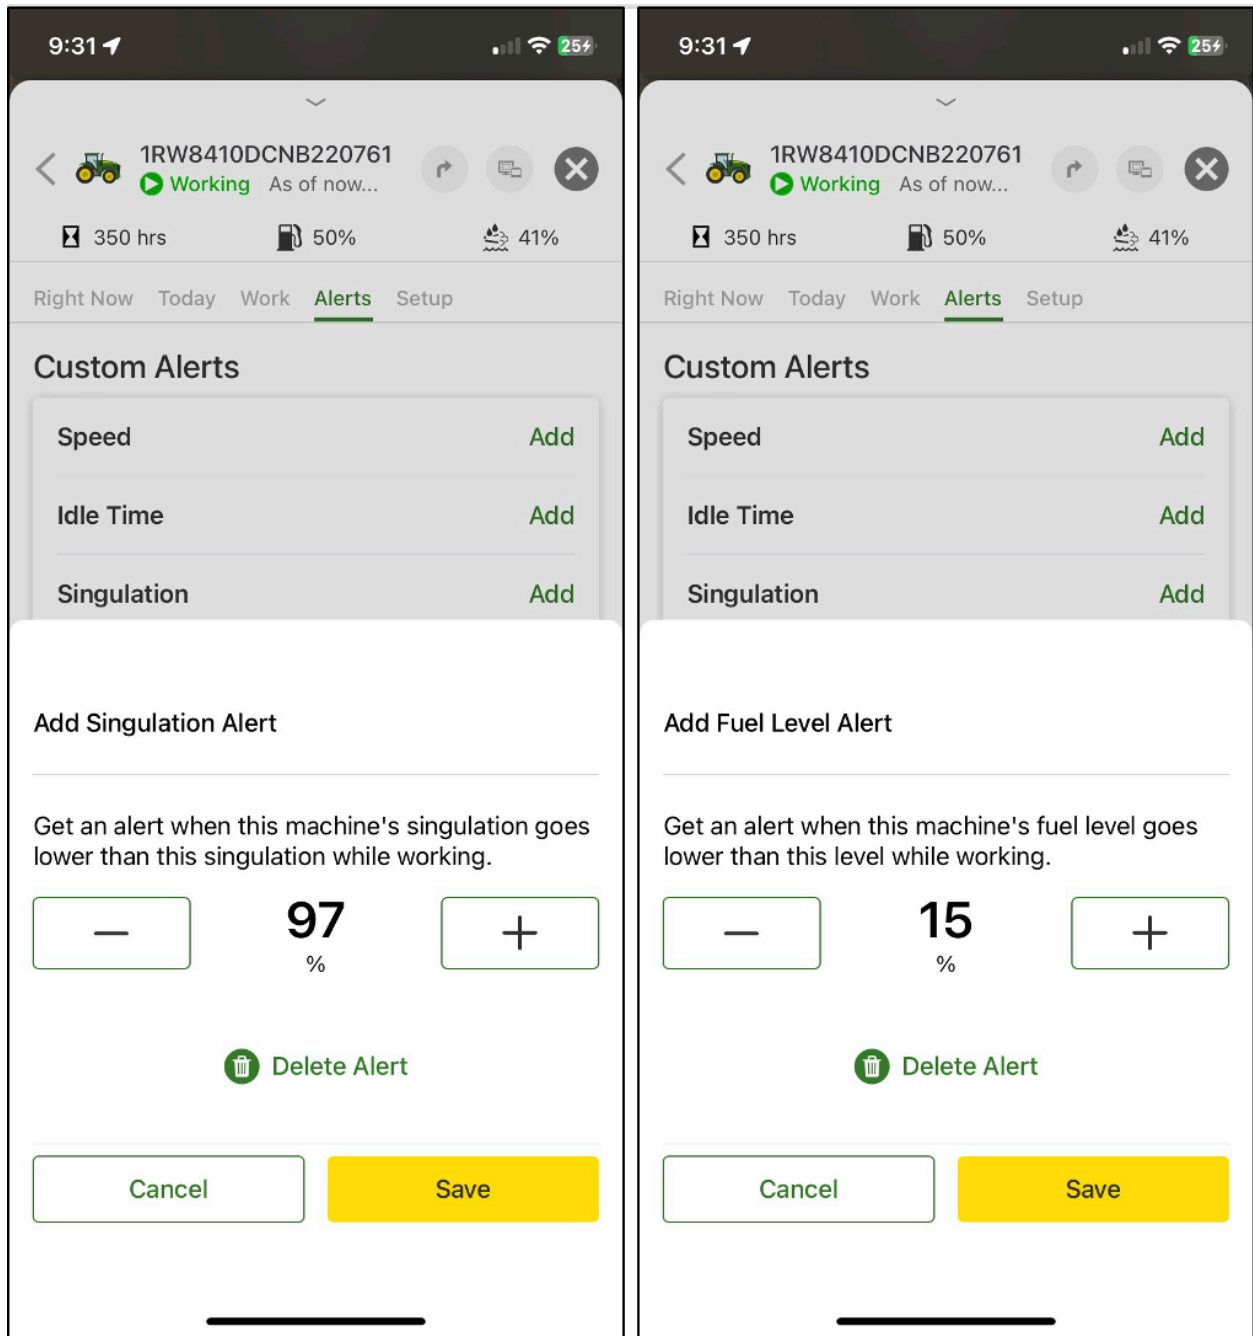

Summary:

- **Custom Alerts Supports Singulation and Fuel Level**
- **Estimated Time Remaining: Know When You Will Be Done**

Detailed release notes:

Custom Alerts Supports Singulation and Fuel Level

- Maintain confidence that quality work is being done without having to constantly check your phone.
- Know when your machines need fueled up without having to check each individual fuel level or make calls to operators.
- Get a push notification from Operations Center Mobile when your SeedStar™ 4 planter's singulation is below your custom threshold.
- Get a push notification from Operations Center Mobile when your JDLink™ connected machine's fuel level is below your custom threshold.

Estimated Time Remaining: Know When You Will Be Done

What's new:

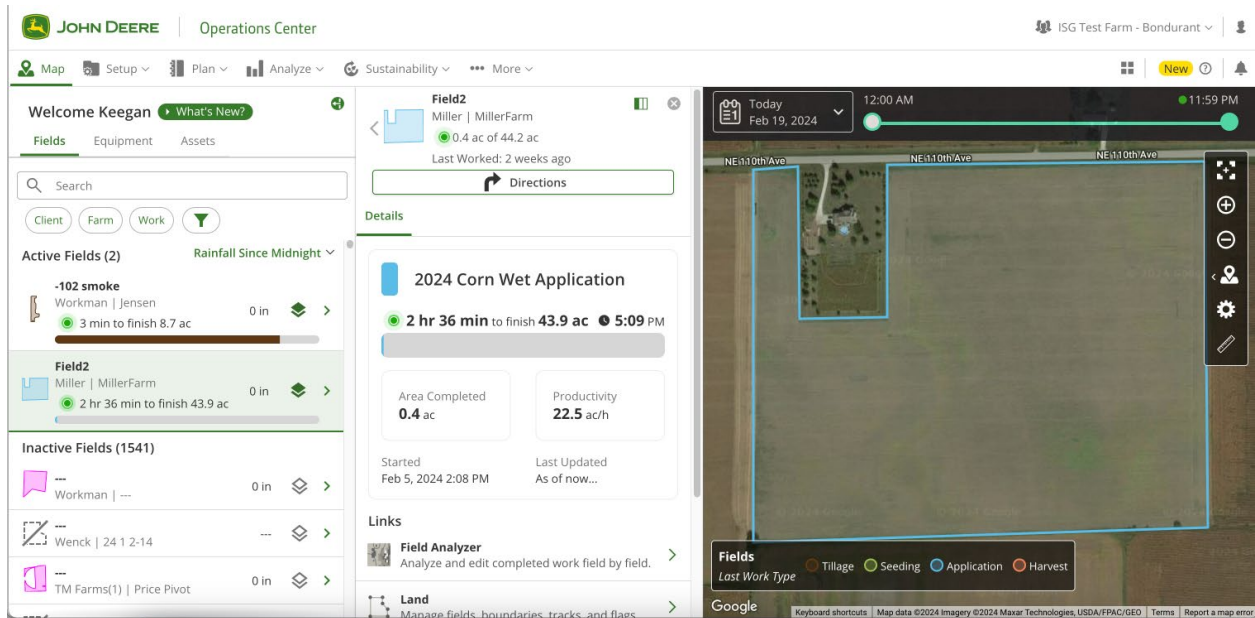

- Estimated Time Remaining now offered on Operations Center Web Map.
- Shown in the Active Fields list, when you click on an active field and when a machine is currently working.
- Know that live data is coming in from the machine when a green beacon is active.
- Let your family know when you will be done with the last field.

Company Use

- Send semis and tender vehicles to the correct field when they are needed.
- Know when to push a little harder to make sure you get the field finished before the rain comes.

Requirements:

- SF3000 or newer receiver
- Generation 4 or newer display
- Connection to Operations Center via modem or hotspot
- Data Sync
